

Tiered Sugar Kettle Fountain Kit

- 1** Secure and stabilize the bottom kettle
- 2** Install pump & upper kettle stand inside of the lower kettle
- 3** Use the cord grommet to bring the cord outside of the kettle
If you have selected the optional lighting package, install the lights in the kettle and use the cord grommet to bring the light cords out of the kettle refer to the manual included with the lights for further operation and installation instructions
- 4** Level the lower kettle
- 5** Install the bulkhead fitting in the upper kettle, and install the male adapter into the bulkhead fittings
- 6** Install the pump discharge, the piece with a rubber coupling, onto the pump
- 7** Carefully lower the upper kettle onto the stand and connect the plumbing from the pump to the male adapter underneath the upper kettle during this process (friction fit only)
- 8** Level the upper kettle, confirm that the lower kettle is still level
- 9** Install the assembly to give your desired effect (friction fit only)
- 10** Confirm level of the kettles for a final time, fill the lower kettle and enjoy your feature!
